DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 having a metal oxide particle (contain or attached) with or to does not particularly point out the invention.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kimura et al [5955230] in view of Rokutanzono et al [5008172] and Morikawa et al [6492081].

Kimura et al teaches a photoconductive member having laminated structure in which the functions are separated into charge generating and charge transporting layers. The outermost layer comprises finely divided metal oxide powder with a binder of a silicon-containing functional group note Col.7 lines 40-60 and again Col.9 lines 35-45. The size of the metal particles is taught by Rokutanzono in Col. 3 along with other silane coupling agents. Morikawa et al also treats metal particles in an electrophotographic photosensitive member note Col. 4-Col. 5. It would be obvious to one of ordinary skill in the art at the time of applicants' invention with a reasonable expectation of success to

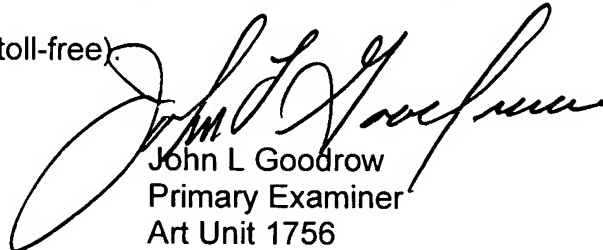

use surface treated metal oxide particles in the outermost layer of an electrophotographic member to improve the durability and conductive properties of the member.

3. Claims 29-34 are allowable.
